SAFETY INSTRUCTIONS
READ AND FOLLOW ALL SAFETY INSTRUCTIONS

IMPORTANT SAFEGUARDS

WARNING:

To guard against injury, basic safety precautions should be observed, including the following:

1. A. Always unplug the LED Waterfall Globe before inspecting or beginning any maintenance procedures.
2. B. Do not use an appliance for other than its intended use. The use of attachments not recommended or sold by the appliance manufacturer may cause an unsafe condition.
3. C. If electrical components of the appliance get wet, unplug the appliance immediately.
4. D. Carefully examine the appliance after installation. It should not be plugged in if there is water on parts not intended to get wet.
5. E. Do not operate any appliance if it has a damaged cord or plug, if it is malfunctioning, or if it has been dropped or damaged in any manner.
6. F. Make sure the appliance is securely mounted on aquarium before operating it.
7. G. Do not install or store the appliance where it will be exposed to the weather or to temperatures below the level of the outlet (or extension cord connector) that prevents water from traveling along the cord to the outlet. If the plug or outlet gets wet, do not unplug the cord. Disconnect the fuse or circuit breaker that supplies power to the appliance. Then unplug the appliance and examine the outlet for presence of water.
8. H. To avoid the possibility of water dripping onto the appliance plug or outlet, the “drip loop” (see illustration) should be arranged for each cord connecting an aquarium appliance to an outlet. The “drip loop” is the part of the cord which is water when needed, but the pump will not start. . . Make sure the AC adapter is plugged into a working electrical source. Also make sure that the AC Adapter Jack is inserted fully into the plug on the back of the Waterfall Globe.
9. I. If the filter still will not start. . . Unplug and remove the filter holder. Grab the bottom of the filter and pull downward, to remove the pump.
10. J. If the LED Light won’t turn on. . . Make sure that the AC Adapter is plugged into an electrical source. Check to make sure that the AC Adapter Jack is inserted fully into the plug on the back of the Waterfall Globe.

LIMITED WARRANTY

Within one year from the date of original purchase, we will repair or replace, at our option, any Waterfall Globe which is deemed defective in workmanship or materials. This includes: Glass Globe, Base with LED Light, AC Adapter, Filter Housing and motor. If the Waterfall Globe is found to be defective, and has not been modified, damaged or misused, please return the unit with a copy of the receipt and proof of date of purchase:

Call (800) 526-0650 for return authorization and shipping address.

Damage or injuries resulting from improper installation, negligence or misuse are expressly not covered by this warranty. Incidental or consequential damages are specifically excluded.

This warranty gives you specific legal rights. You may also have other rights which vary from state to state.

Impfen
IMPORTANT SAFEGUARDS

WARNING:

To guard against injury, basic safety precautions should be observed, including the following:

1. If the appliance falls into the water, do not reach for it. First unplug it and then retrieve it.
2. Do not operate any appliance if it has a damaged cord or plug, if it is malfunctioning, or if it has been dropped or damaged in any manner.
3. To avoid the possibility of water dripping onto the appliance plug or outlet, position aquarium stand and tank to one side of a wall-mounted outlet. A “drip loop” (see illustration) should be arranged for each cord connecting an aquarium appliance to an outlet. The “drip loop” is the part of the cord that prevents water from traveling along the cord to the outlet. If the plug or outlet gets wet, do not unplug the cord. Disconnect the fuse or circuit breaker that supplies power to the appliance. Then unplug the appliance and examine the outlet for presence of water.

SAVE THESE INSTRUCTIONS

For optimum waterfall performance, replace filter cartridge (Tetra Bio-Bag) every 3 to 4 weeks for optimal fish health. Available at your local retailer.

To Remove Impeller for Cleaning

1. Grasp the bottom of the filter and pull downward, to remove the pump.
2) Remove pump cover.
3) Use Needle Nose Pliers to remove the Impeller. Clean impeller with tap water when needed.
