

# cage assembly instructions

Parrot Playstand  
Model: # 3181

cage dimensions: 17 $\frac{5}{8}$ "L x 16 $\frac{1}{2}$ "W (base)  
26" L x 25" W (seed guard)  
59" H (floor to top of 3-ring toy rack)  
storage shelf space: 10 $\frac{1}{2}$ " H

## getting started!

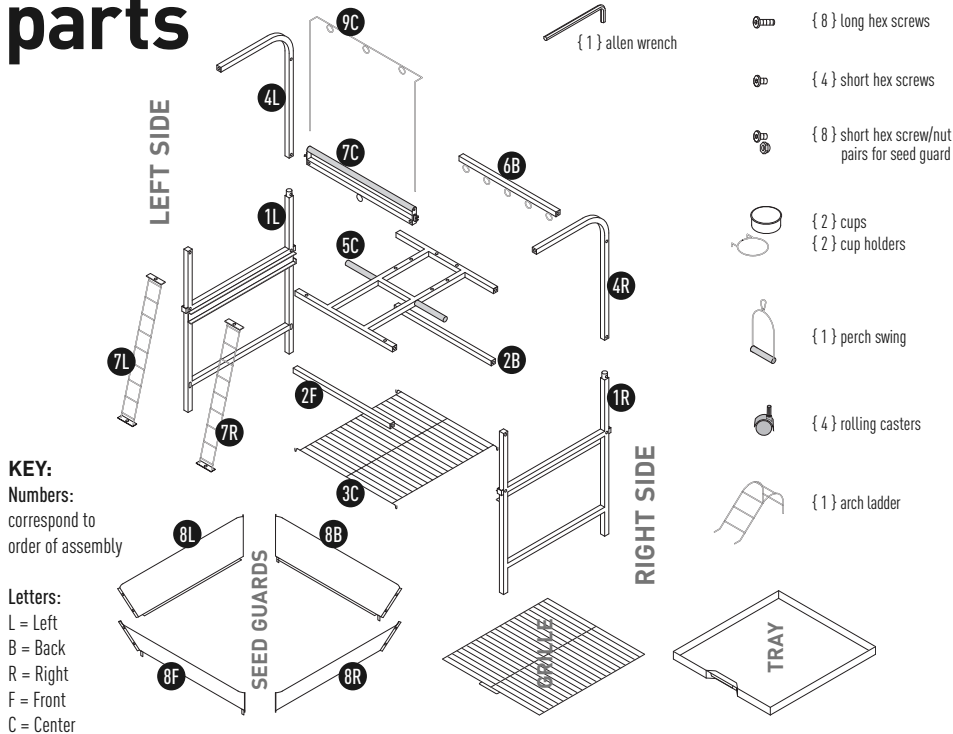

### READ THESE NOTES FIRST:

- **Count Hardware:** Extra screws may be included. If the screw count is short or parts are missing, please contact Prevue Customer Service.
- **Tools:** An allen wrench is included. You may use your own hand tools, but we **do not recommend power tools!** Parts can be over-tightened and damaged. Prevue is not responsible for this type of damage.

• **Review All Parts:** If any parts are seriously damaged, please contact Prevue Customer Service.

Review these instructions thoroughly before attempting to assemble playstand. If you require assistance, please contact Prevue Customer Service at 800.243.3624 or through links online at [prevuepet.com](http://prevuepet.com)

## parts

## steps

**1** Lay the side left (1L) and side right (1R) frames on their sides and insert the rolling casters.

**2** The tray channels on the frames should be facing each other, and the rounded post ends (at the top back of the frames) should be closest to the floor. Locate the duplicate frame front (2F) and frame back (2B) bars and attach them to the side frames (just above the tray channels), with long hex screws. DO NOT FULLY TIGHTEN.

**3** The storage shelf (3C) grille has U-shaped extensions at each corner. The U-shaped wires correspond with slots in the side left and side right (1L & 1R) frame legs.

By leaving Step 2 screws loose, there should be a little play in the legs. Insert the U-shaped ends into the slots on the left side first; then insert the right side.

When the storage shelf is in place, the hex screws from Step 2 may be fully tightened, creating a secure and stable base for the Playstand.

**4** Locate the duplicate perch bar support (4L & 4R) posts. Insert the open end of the bar over the rounded back posts on the side left and side right frames.

Make sure the holes on the rounded posts are aligned with the holes on the support posts.

# 5

Locate the **central playbar (5C)** frame.

Note these characteristics, which will help you orient the central playbar frame:

- Two holes on the top surface of the front bar, near the ends (see Step 7: straight ladders);
- Two holes on the top surface of the back-half center bars (left & right) (see Step 9-5: cup holders/cups)
- Two holes on the top surface of the back bar near the middle, and two holes (hidden from view in the illustration) on the back side/vertical surface of the center bar (see Step 9-6: arch ladder).

Align the playbar with the holes on the side frames as shown, and install into place with long hex screws.

# 6

Install the **5-ring toy rack (6B)** bar. Align the holes in the ends of the toy rack with the holes near the top of the perch bar support posts. Install into place with two long hex screws.

# 7

Locate the **center perch (7C)** bar and the duplicate **straight ladder (7L & 7R)** components.

Separately, install the ladders to the underside of the center perch bar with short hex screws.

With the center perch bar/ladders unit assembled, attach it to the playstand:

- at the top with long hex screws, through the perch bar, into the threaded receiving holes in the end of the perch bar support posts;
- at the base with short hex screws, through the ladder base, into the center playbar frame.

# 8

Pre-assemble **seed guard pairs (8F + 8R) (8B + 8L)** by turning them upside down and attaching them with the nut/short hex screw pairs.

Short tabs on front & back seed guards (8F & 8B) fit into sleeves on front & back leg frames.

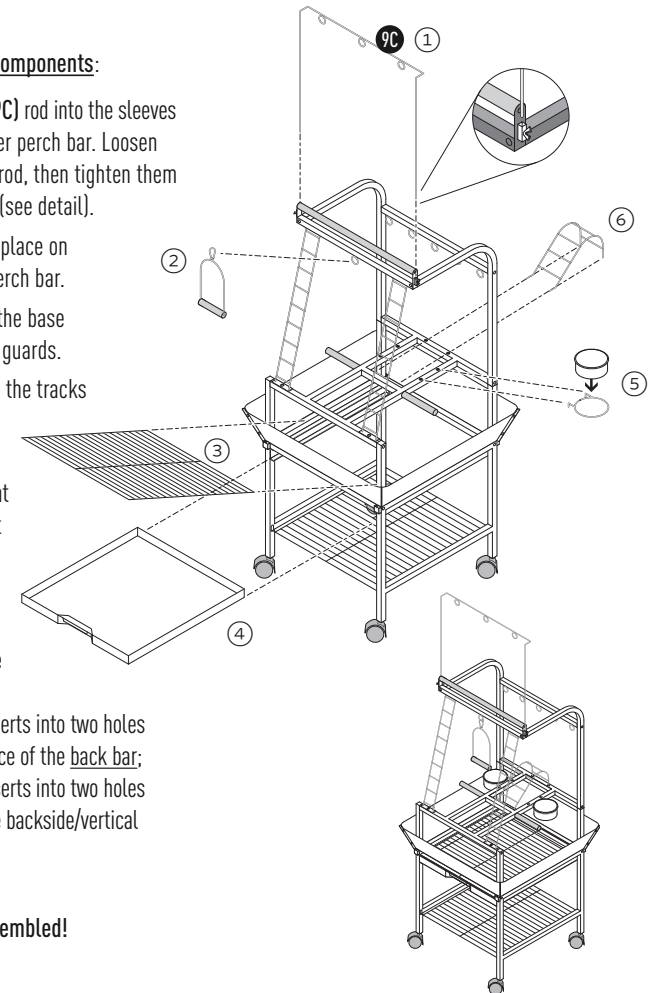

Insert the seed guard pairs into place, and finish assembling at the loose corners with the remaining nut/screw pairs.

# 9

Assemble the remaining components:

- ① Insert the **3-ring toy rack (9C)** rod into the sleeves on the outsides of the center perch bar. Loosen the wing nuts to insert the rod, then tighten them to secure the rack in place (see detail).
- ② Hook the **perch swing** into place on the ring under the center perch bar.
- ③ Insert the **grille** down into the base from the top, over the seed guards.
- ④ Insert the **tray** into place in the tracks under the seed guards.
- ⑤ In the pairs of holes on the top surface of the left & right back-half center bars, insert the **cup holders**. Insert the **cups** into the holders.
- ⑥ Insert the **arch ladder** in the holes at the back of the central playbar frame:
  - The back of the ladder inserts into two holes near the middle/top surface of the back bar;
  - The front of the ladder inserts into two holes (hidden from view), on the backside/vertical surface of the center bar.

★ Your cage is now fully assembled!
