

Warning

When not in use or not being worn by your pet, please keep our product out of reach from children and animals. A very small percentage of pets and people may experience epileptic seizures or blackouts when exposed to flashing light. So please be careful before using our products, since they have flashing lights.

How to operate the different light settings

To operate the LED light there is a button hidden beneath the fabric on top of the battery.

Press the button 1 time to activate static mode.

2 clicks for rapid flashing.

3 clicks engages slow flashing.

How to charge the battery

Charging takes 30 minutes – 1 hour.

Plug the cable into the battery. The other end of the cable can be plugged into the USB port of a laptop, notebook, outlet or any other charging device.

When the battery is charging, the illuminating strips will glow dimly. The light will switch off when the battery is fully charged.

Important: Never submerge the unit in water.

Cleaning

Use a damp sponge or wipe cloth to clean the unit. Avoid direct contact with the button. Short circuit will occur if water makes contact with the circuit board.

IMPORTANT Never submerge the unit in water.

Handling and Storage: Our LED products offer some water resistance to moisture and splashing. However please do not submerge under water.
