

STEP 3 ATTACHING YOUR POD

NOTE: Pod attaches nicely to almost anything using the supplied straps.

*NOTE: The rubber strap should simply loop through the unit and around whatever you're attaching it to. Fasten it in place by stretching the most appropriate hole **A** over the top of the button **B**.*

STEP 1 CHARGE THE BATTERY

Before setting up your new Pod, please charge one of the included batteries for 2 hours. The charging dock comes with a battery already attached to it, ready to charge.

- 1 Insert the charging dock **A** into a USB port on your computer or a USB wall plug.

NOTE: An orange light will show that the battery is being charged. The battery needs to be charged until the orange light turns green after 2 hours.

- 2 Once the battery **B** is charged, remove it from the charging dock by twisting it counter-clockwise until the arrow on the battery lines up with the picture of the open padlock.
- 3 Once in the unlock position, simply remove the battery from the dock.

REMOVING THE BATTERY

- 1 The Pod comes with a battery already attached and locked. You need to remove the existing battery first.
- 2 Firmly twist the battery counter-clockwise until the arrow on the battery lines up with the picture of the open padlock on the Pod.
- 3 Remove the battery once in the unlock position.

ATTACHING THE BATTERY

- 1 Attach the new battery by lining up the arrow on the battery with the picture of the open padlock on the Pod.
- 2 Push the battery into place by pressing it down into the unlock position.
- 3 Firmly twist the battery clockwise until the arrow lines up with the picture of the closed padlock.

STEP 2 POWER UP YOUR POD

The Pod icon on the bottom of your Pod is the status light. Once the battery is attached, the unit is on.

- 1 Once the battery is attached, go outside to an open area with a clear view of the sky away from buildings and trees. The light will indicate the status of the Pod.

NOTE: Pod will go into a start-up phase once the battery is attached. During this period, the light will flash every few seconds to indicate the status of the Pod, as explained in the table ...as shown below.
