

STEP 1

1A

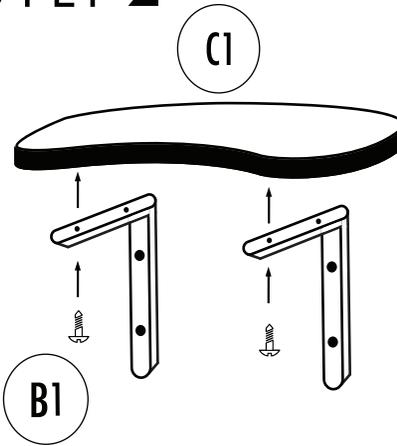

Grab perch (C1) or (C2), place it on your lap with the leaves facing down.

1B

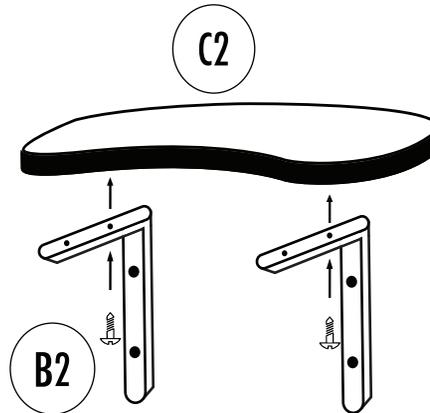

Insert L-brackets into the guided slots under each perch until flush. Do this for both perches (C1) and (C2).

STEP 2

2A

Screw in (B1) into the thinner portion of the L-bracket into the perch (C1). Repeat step for perch (C2).

2B

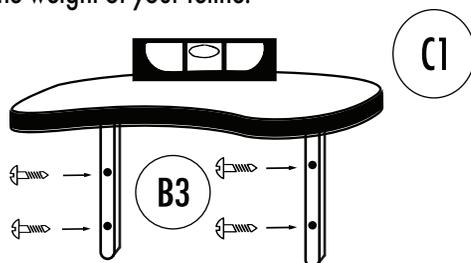

Screw in (B2) into the thicker portion of the L-bracket into the perch (C1). Repeat step for perch (C2).

STEP 3

3A

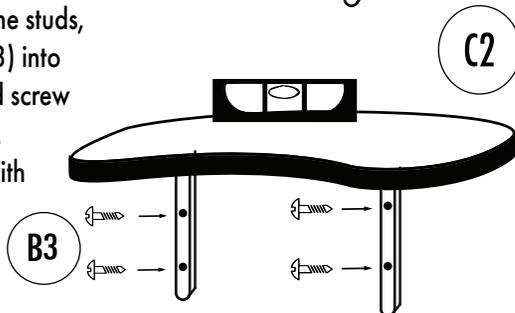

Please locate the studs on the wall where you want to place your perch. Use a level on the flat portion of the shelf to align it straight.

NOTE: L-brackets are 16" apart to ensure correct installation into the wall studs. If screws are not aligned into the wall studs it might not support the weight of your feline.

3B

After you locate the studs, insert the bolts (B3) into the L-brackets and screw them into the wall. Repeat this step with perch (C2).

Thanks for choosing On2Pets.

Your suggestions and satisfaction are important to us. If you are satisfied with our product, could you share a positive review? If there are any defects or any problems concerning our products please feel free to contact us at www.on2pets.com/contact. We will arrange the necessary solutions for your complete satisfaction.
