

BED RESHAPING INSTRUCTIONS:

Some beds need to be re-shaped after being flattened by shipping. If your product is misshapen upon opening, please refer to the following process:

STEP 1: After removing bed from plastic packaging, take cushion out.

STEP 2: Flip shell of bed inside out and fold in half.

STEP 3: Put bed on its side with pillow sandwiched between the sides.

STEP 4: Now that you have the bed on its side, place bed underneath an object of 2 lbs or less, preferably something large enough to encompass the majority of the bed. (example: a book)

STEP 5: Keep pram bed flattened and compressed for at least 24 hours to hold the shape in place.

STEP 6: Once 24 hours has passed, take weighted object off of the bed, remove cushion, and flip bed right-side out. Re-insert cushion and fluff bed for pet's use!
