

## *UltraLite Bi-fold Pet Ramp Care & Use Guide*

Thank you for purchasing the durable, easy-to-use UltraLite Bi-fold Pet Ramp from SOLVIT Products. With proper care, your Pet Ramp should provide years of trouble-free service.

The Pet Ramp should come packaged with the safety locking strap engaged (on side of ramp, see image). To disengage, pull on the finger tab which will remove the bulb end from the opposite ramp piece.

To use the Pet Ramp, simply unfold into a straight shape, set the angled, upper end (with the “Solvit” logo) on the surface to which the pet is trying to climb (car, couch, etc.), and set the angled, lower surface on the ground. When finished, simply fold the ramp into the closed position, engage the safety locking strap, and stow in a convenient place.

It is important to make sure the rubber feet on the upper and lower ends of the ramp are resting firmly on a stable surface (car bumper, sidewalk, etc.) before using. If the rubber feet are not in contact, the ramp could shift during use.

Please note when the safety locking strap is not engaged, it is possible for the ramp to swing open unintentionally. Always engage the locking strap when the ramp is not in use.

**CAUTION: The SOLVIT Pet Ramp is designed for use only by pets such as dogs, cats, and small animals. It is not intended to carry humans or heavy loads. Using the Ramp in this way voids the warranty and creates an unsafe situation! Please follow this guideline strictly.**

Training: Many pets will begin using the Pet Ramp with no hesitation. If your pet is unsure at first, lay the Ramp flat on the ground and allow your pet to become comfortable walking on it before using it in an inclined position. It also helps to hold your pet by the collar and offer reassuring praise and/or treats as your pet gains confidence using the Ramp. For vehicle use, command your pet to stay inside the vehicle until the Ramp is deployed, then walk your pet down safely.

Cleaning & Maintenance: If the plastic parts of the Pet Ramp become dirty, simply clean with any standard household cleaner. The tread material can be cleaned with mild detergent and a stiff brush, or a strong jet of water. The Ramp should be maintenance-free. If a problem occurs, please contact Customer Service below.

Warranty: The Pet Ramp is warranted to be free from defects in materials or workmanship for a period of one (1) year from date of purchase.
